

# IQClick

Interactive Response System

[www.iqboard.net](http://www.iqboard.net)

## • Track Progress Easily

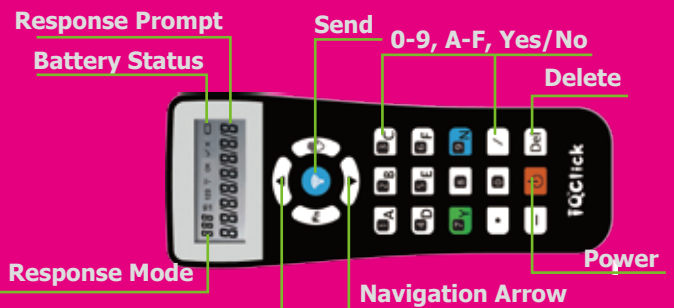

Track progress through instant feedback with IQClick to help teacher determine whether he/she needs to review, re-teach or proceed with the remainder of lesson.

## • Assess Student Understanding

Once the entire class respond to questions using their handset IQClicks, results are instantly viewed and analysed in a pie chart or bar graph in IQ Interactive Education Platform. Thus teachers easily measure and evaluate group or individual performance.

## • Engage Every Student

With IQClick at hand, students are not passive listeners as before. Instead, they are active participants. IQClick enhances interactive learning by giving even the most timid students a voice.
